DANGEROUS DAN IS COCK SURE OF HIMSELF BUT CLUELESS WITH A TOTAL DISREGARD FOR PERSONAL SAFETY, TOTALLY OTT.

FX. DANGEROUS DAN INTRO.

Scene 1.

EXT. JUNGLE IN PERU. DAY.

FX. JUNGLE DRUMS BACKGROUND.

DANGEROUS DAN: Hi, welcome to the pod keyboard warriors. I'm in deepest, darkest Peru, the scenery is breath-taking but the lack of duffle coated bears in red hats is very disappointing! Don't forget to hit like and share so I can go on these all-inclusive trips, just to show you places you'll never be able to afford to go.

With me, is a Volcanologist, which I'm told has nothing to do with Star Trek! Dr Eerie Bottom is convinced an eruption is imminent, every other expert disagrees. Dr, why are YOU so sure this dormant titan is about to awaken when the last time it went off was over 175 years ago?

FX. JUNGLE SOUNDS.

DR ERRINBOTTON: I keep telling you my name is Erribotton, ERRI-BOTTON.

D DAN: Are you sure? Anyway, what's important is the potential threat and how it could affect our planet yeah. We've already been shafted by deforestation, there's wars AND cow farts, to deal with so what the 'F' man.

DR ERRINBOTTON: Do you have *any* idea how many active volcano there are on this planet?

D DAN: Right Now? Well there's been nothing in the news, so I'm going to say, one or two?

DR ERRINBOTTON: Imbecile. There are more than 1500, they are part of our planets ecosystem and vital for providing many essential things. My studies show conclusively that this one is EXTREMELY unstable.

D DAN: Well, I think you may just be exaggerating Eerie. Doesn't look like anything has happened here for centuries, look at all the greenery, even derelict buildings and shit.

DR ERRINBOTTON: You cannot judge a book by its cover, there are many factors that have to be taken into consideration when examining the research....

D DAN: (INTERRUPTS). Yeah, yeah. Blah, blah science, blah, blah books. If it was that unstable just throwing this rock could set it off.

DR ERRINBOTTON: I wouldn't do that.

FX. LARGE EXPLOSION, ROCKS FALLING BACK TO EARTH.

D DAN: SHIT! Ouch! What was that?!

DR ERRINBOTTON: I was going to explain that my research shows certain, less than reputable military departments, have been using the crater to store unstable ordinance for years.

FX. DEEP RUMBLING AND SHAKING SOUNDS.

D DAN: (BREATHING HEAVILY WHILST RUNNING). What's that?

DR ERRINBOTTON: (BREATHING HEAVILY WHILST RUNNING). That will be the eruption I was exaggerating about earlier.

D DAN: Got to go! Tune in next week: Tsunamis, real or internet fakery?

END
